PERSONAL PROJECTS

Social Distance Detector Using Deep Learning

- A social distance detection method that uses deep learning to assess the distance between people to mitigate the impact of the coronavirus pandemic. The detection tool is designed to remind people to keep a safe distance from each other by evaluating video sources.

Technical Desktop Confederate using Python

- Technical Desktop Confederate is a Digital Life Assistant which primarily uses human communication methods such as instant messaging and voice to establish two-way communications between a human and his assistant, such as manipulating music, assisting in sending emails, and assisting in wikipedia searches, among other things.

Supermarket Billing System

- Supermarket billing system is the system to automate the process of ordering and billing of a supermarket store. This software assists supermarket owners in calculating how many products are sold and to generate the bill for the customer.
